# Tonic Styled UI in Static-UI

- Use common components in component folder first
- Implement pages/containers/components by using Tonic Styled UI
- In config/theme.js, define custom styles including light(default) / dark mode, then use them in [component\_name].css.js. Example: header.css.js

# Let's fix a bug (?!)

Add space between texts.

- PR: TIP-65137 [UI] In appliance detail page, threat Intelligence description missing a space  
<https://dsgithub.trendmicro.com/cloud-one-network/static-ui/pull/676>
- Tips: In text component, add mx="1x" for margin-left and margin-right.
  - Rem: 相對單位, 每個元素透過「倍數」乘以根元素 (html tag) 的 px 值
  - 1x === 0.25rem (defined here <https://trendmicro-frontend.github.io/styled-ui/spacing>)

 **Out of date** Verify sync management settings [here](#).

# Let's fix a bug (?!)

Refactor styles by using Tonic Styled UI.

Update the icon in column “Threat Intelligence” and “Splunk Status”.

- PR: TIP-66229-update-appliances-styles

<https://dsgithub.trendmicro.com/cloud-one-network/static-ui/pull/739>

- Tips

- Use <Status> instead of styled span
- Use <StatusContent> to layout

Network > Appliances
